

# Legend

## Off-Street Bicycle Facility

An off-street bicycle facility is present. Normally at least 8 feet wide and either concrete or asphalt.

## Bicycle Facility

These roads have on-street bicycle facility (bike lane or 3-foot/greater paved shoulder). May have high traffic volume requiring caution.

## Cycling Route

These roads do not have on-street bicycle facility. Used by experienced cyclists because of low traffic volume, scenic beauty or connectivity between locations. Require caution.

## Cycling Connecting Route

These roads do not have on-street bicycle facility. Used by experienced cyclists because of connectivity between locations. May have high traffic volume or narrow road width. Require extra caution.

## Bicycle Facility on Cycling Route

These roads have on-street bicycle facility (bike lane or 3 feet/greater paved shoulder). Require caution.
